

Отчет по индивидуальному проекту

Этап 5

Мокочунина Влада Сергеевна

Содержание

1	Цели и задачи	5
2	Выполнение лабораторной работы	6
3	Выводы	8
	Список литературы	9

Список иллюстраций

2.1	Проекты	6
2.2	Пост о неделе	7
2.3	Пост о языках	7

Список таблиц

1 Цели и задачи

Написать проекты и посты

2 Выполнение лабораторной работы

1. Я изменила записи проектов. (рис. [2.1]).

Formal Definition of a Function Limit:

The limit of $f(x)$ as x approaches x_0 is L , i.e.

$$\lim_{x \rightarrow x_0} f(x) = L$$

if, for every $\epsilon > 0$, there exists $\delta > 0$ such that, for all x ,

$$0 < |x - x_0| < \delta \implies |f(x) - L| < \epsilon.$$

Suppose that $\lim_{x \rightarrow a} f(x) = M$ and $\lim_{x \rightarrow a} g(x)$

$$\lim_{x \rightarrow a} (f(x) + g(x)) = M + N$$

These can all be proved via application of the epsilon-delta definition. Note that the results are only true if the limits of the individual functions exist: if $\lim_{x \rightarrow a} f(x)$ and $\lim_{x \rightarrow a} g(x)$ do not exist, the limit

#This Week

Last week I studied, went to the gym to train and worked. Basically nothing out of the ordinary

#Programming Languages

1. Javascript

JavaScript is a high-level programming language that is one of the core technologies of the World Wide Web. It is used as a client-side programming language by 97.8 percent of all websites. JavaScript was originally used only to develop web browsers, but they are now used for server-side website deployments and non-web browser applications as well.

Javascript was created in 1995 and was initially known as LiveScript. However, Java was a very popular language at that time, so it was advertised as a “younger brother” of Java. As it evolved over time, JavaScript became a fully independent language. Nowadays, JavaScript is often confused with Java, and although there are some similarities between them, the two languages are distinct.

2. Python

Python is one of the most popular programming languages today and is easy for beginners to learn because of its readability. It is a free, open-source programming language with extensive support modules and community development, easy integration with web services, user-friendly data structures, and GUI-based desktop applications. It is a popular programming language for machine learning and deep learning applications.

Python is used to develop 2D imaging and 3D animation packages like Blender, Inkscape, and Autodesk. It has also been used to create popular video games, including Civilization IV, Vegas Trike, and Toontown. Python is used for scientific and computational applications like FreeCAD and Abacus and by popular websites like YouTube, Quora, Pinterest, and Instagram.
